ABOUT THIS COURSE

The Lattice Boom Mobile Crawler Crane C38 Operator Skills Programme equips learners with the theoretical knowledge and practical skills required to safely operate a Lattice Boom Mobile Crawler Crane (Code C38) in accordance with South African legislation and the National Code of Practice (NCoP).

Learners will gain competence in conducting pre-start inspections, planning lifting operations, operating the crane safely, handling loads, performing rigging and slinging activities, carrying out shutdown procedures, and ensuring compliance with workplace health, safety and environmental requirements.

The programme combines classroom learning with practical workplace application to prepare operators for lifting operations across various industries.

Target Audience

- Gas Practitioners
- Gas Installers
- System Installers
- Gas System Installers
- Medical Gas System
- Oxidant Gas System
- Speciality Gas System
- Gas Technicians
- Maintenance Technicians

DAY ONE

OVERVIEW

SMART ZONE

Safety, Health, Environmental, Risk and Quality (SHERQ)

- Learners are introduced to SHERQ principles applicable to lifting operations, ensuring compliance with workplace safety, environmental protection and quality standards.

Occupational Health and Safety Legislation

- Develop an understanding of South African health and safety legislation, legal responsibilities and safe operating practices for lifting machinery.

Equipment, Materials and Maintenance

- Learn about crane components, inspection procedures, preventative maintenance and the safe handling of equipment and materials.

Lifting Machine Components

- Identify and understand the purpose and function of the major components of a Lattice Boom Mobile Crawler Crane.

Rigging and Slings Principles

- Gain knowledge of safe rigging methods, sling selection, lifting accessories and correct load attachment procedures.

Freight Handling Techniques

- Learn correct methods for handling, positioning and transporting loads safely and efficiently.

Implementing Visual Merchandising Plans

- Learners are introduced to the practical implementation of visual merchandising plans and action plans. This includes preparing the display area, adapting display plans to suit available space, organising resources, securing merchandise and following safety requirements.

Preparing Display Areas

- Learners gain an understanding of how to prepare a display or window area before setting up a new display. This includes identifying props, fixtures and display carriers, preparing signage, removing existing stock safely, dismantling existing displays and applying housekeeping standards.

Dressing the Display or Window

- Learners develop practical skills to dress and build a display or window. This includes adapting the visual merchandising plan to meet display requirements, arranging merchandise, applying visual merchandising principles and building displays in a way that minimises loss, damage and injury.

Promotional Activities and Displays

- Learners are introduced to promotional activities and promotional display methods. This includes types of promotions, types of promotional displays, positioning of promotional displays, promotional signage, ticketing and the impact of display positioning on customer attention and sales.

Maintaining Visual Merchandising Displays

- Learners gain knowledge of how to maintain visual merchandising displays after implementation. This includes replenishing stock sold from the display, replacing sold-out items, removing damaged stock, redressing displays and maintaining housekeeping standards.

FEATURES OF THIS COURSE

SMART ZONE

- QCTO-aligned occupational curriculum
- Combines theory, practical skills and workplace experience
- Industry-relevant commercial natural gas installation skills
- Focus on safe, legal and code-compliant gas systems
- Covers system design, installation, commissioning, maintenance and compliance
- Supports workplace readiness in commercial gas environments

BENEFITS OF THIS SHORT COURSE

- Gain practical chemical plant control knowledge and skills
- Understand process control systems, plant variables, and production schedules
- Improve ability to monitor plant operations and respond to deviations
- Learn how to apply quality control and meet product specifications
- Develop confidence in reporting, record keeping, and shift handover
- Enhance career opportunities in chemical, manufacturing, and process plant environments
