ABOUT THIS COURSE

This Skills Programme prepares learners to operate a Lattice Boom Mobile Truck Crane C37 safely and efficiently in accordance with the National Code of Practice (NCoP Code C37). Learners will develop the theoretical knowledge and practical skills required to inspect, set up, operate and safely shut down a lattice boom mobile truck crane in a variety of lifting environments.

The programme covers safety legislation, equipment inspection, rigging and slinging, communication, lifting machine operations, load planning, crane operation, legal road travel compliance and safe shutdown procedures. Learners will gain the competence required to safely lift, move and position loads while complying with workplace health, safety and legal requirements.

The programme combines classroom theory with practical workplace application to prepare learners for safe and competent operation of a Lattice Boom Mobile Truck Crane C37.

Target Audience

- Gas Practitioners
- Gas Installers
- System Installers
- Gas System Installers
- Medical Gas System
- Oxidant Gas System
- Speciality Gas System
- Gas Technicians
- Maintenance Technicians

DAY ONE

OVERVIEW

SMART ZONE

Safety, Health, Environmental, Risk and Quality (SHERQ)

- Learners are introduced to SHERQ principles applicable to lifting operations, ensuring compliance with workplace safety, environmental protection and quality standards.

Occupational Health and Safety Legislation

- Develop an understanding of South African health and safety legislation, legal responsibilities and safe operating practices for lifting machinery.

Equipment, Materials and Maintenance

- Learn about crane components, inspection procedures, preventative maintenance and the safe handling of equipment and materials.

Lifting Machine Components

- Identify and understand the purpose and function of the major components of a Lattice Boom Mobile Crawler Crane.

Rigging and Slings Principles

- Gain knowledge of safe rigging methods, sling selection, lifting accessories and correct load attachment procedures.

Freight Handling Techniques

- Learn correct methods for handling, positioning and transporting loads safely and efficiently.

Conducting Pre-start and Operational Checks

- Learners perform work area inspections, identify hazards, inspect crane components, complete pre-start inspections and conduct operational checks according to manufacturer specifications.

Conducting Set-up Checks

- Learners prepare the crane for operation by assessing ground conditions, identifying obstructions, stabilising the crane, positioning outriggers and completing risk assessments before lifting operations.

Planning and Preparing for Lifting

- Learners establish load dimensions, determine load weight and centre of gravity, select appropriate lifting tackle, perform rigging and slinging activities, interpret load charts and establish safe lifting routes.

Preparing the Crane for Legal Travel

- Learners complete travel documentation, configure the crane for road travel, verify permits, assess legal compliance and ensure correct travel configuration according to Road Traffic regulations.

Operating the Lattice Boom Mobile Truck Crane C37

- Learners safely hoist, slew, move and position loads, maintain load stability, interpret hand signals, communicate with signal personnel, operate crane controls and follow safe lifting procedures.

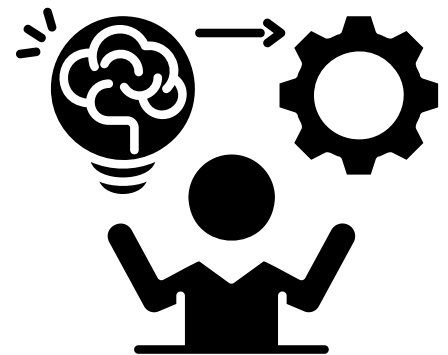

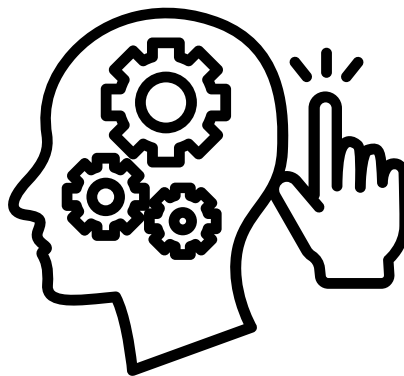

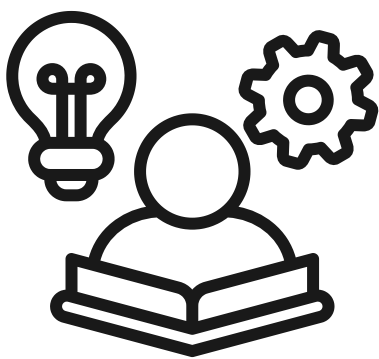

Parking, Refuelling and Shutdown

- Learners safely remove loads, secure lifting equipment, park the crane correctly, apply shutdown procedures, secure all controls, perform safe refuelling procedures and store the crane according to workplace requirements.

FEATURES OF THIS COURSE

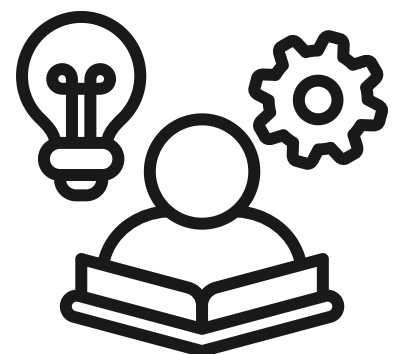

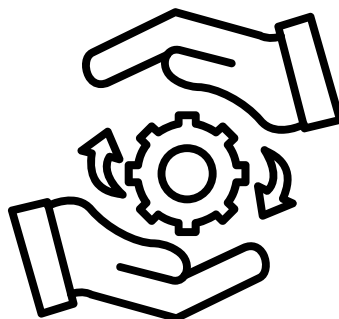

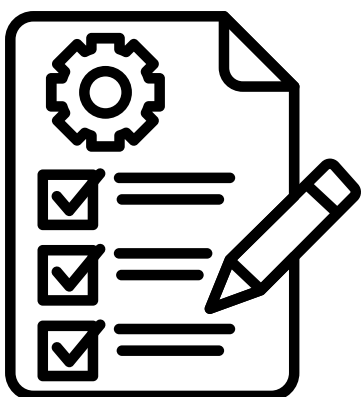

SMART ZONE

- QCTO-aligned occupational curriculum
- Combines theory, practical skills and workplace experience
- Industry-relevant commercial natural gas installation skills
- Focus on safe, legal and code-compliant gas systems
- Covers system design, installation, commissioning, maintenance and compliance
- Supports workplace readiness in commercial gas environments

BENEFITS OF THIS SHORT COURSE

- Gain practical chemical plant control knowledge and skills
- Understand process control systems, plant variables, and production schedules
- Improve ability to monitor plant operations and respond to deviations
- Learn how to apply quality control and meet product specifications
- Develop confidence in reporting, record keeping, and shift handover
- Enhance career opportunities in chemical, manufacturing, and process plant environments
